1. What Is Fractional Ownership Real Estate?

Fractional ownership real estate is the modern way to invest in property — without needing full ownership or large capital. Instead of purchasing an entire property, investors buy **fractions (shares)** in premium real estate assets and enjoy returns based on their percentage of ownership.

At **Vairt**, this model allows investors to own part of income-generating real estate — from residential homes to short-term rentals — all fully managed and compliant with Islamic finance principles.

2. How Fractional Real Estate Investing Works
